Preventive Maintenance Plus Agreement

We schedule spring March 15th Fall October 15th

1. The importance of this agreement

- Helps equipment run at peak efficiency and reduces potential breakdowns and failures.
- Improves indoor air quality.
- An efficient operating system lowers energy cost.
- The coolant levels need to be checked annually.
- Saves you money.

2. What we do

This is a spring and fall plan. This plan includes complete inspection and diagnostics of the air-conditioning and heating equipment. The spring consist of condenser unit and coil cleaning, evaporator coil cleaning & sanitizing. Drain flushing and algaecide treatment. Up to 1lb of Freon per system for adjustments. Fall maintenance consist of inspection on the condition of the system and the operating components. Safety inspection on the heat exchanger, fuel supply and heat strips. Check the duct work and run the system to check all operations.

3. The benefits of a plus customer

- Complete spring and fall maintenance service.
- Priority service with no service call charges.
- 10% discount on standard pricing of repairs and equipment.
- 10% discount on each system up to 3.
- *Emergency after hour services discounted.*
